

## **Sun Protective Clothing**

**Sun protective clothing** is clothing specifically designed for sun protection and is produced from a fabric rated for its level of ultraviolet (UV) protection.

**UPF** (Ultraviolet Protection Factor) represents the ratio of sunburn-causing UV with and without the protection of the fabric, similar to SPF (Sun Protection Factor) ratings for sunscreen. While standard summer fabrics have UPF 6, sun protective clothing typically has UPF 30, which means that only 1 out of 30 units of UV will pass through.
